Fishes you can find

- ### For safely enjoying the beaches
1. Inform your lodging staff where you're going and around what time you'll be returning.
 2. Refrain from swimming if you're feeling unwell.
 3. Always swim with 2 people or more for safety.
 4. Wear rash guards or t-shirts when swimming to protect yourself from UV rays and corals. Gloves are also recommended.
 5. Always keep an eye on children, even in shallow areas.
 6. Be careful of waves, swells, and currents. Always check your position in the sea while swimming.
 7. Stay alert when in the water as sea kayaks or boats may approach nearby.
 8. Make sure to stay hydrated as you can also sweat while swimming.
 9. Please enjoy taking pictures and leave the nature intact.

For emergencies

Emergency/ Distress: 119
Accident at sea: 118

Ogasawara Village Clinic

Stay calm and provide the following information.

1. Current condition of the person in need of help (specifically as possible)
2. Name, age, lodging of the person in need of help
3. Current location
4. A telephone number that can be reached later

(1) Omura Beach

Omura Beach [2 min. on foot from ★] Located near town with a shower, changing room, and resting space. Perfect for enjoying a swim or even a stroll.

(2) Miyanohama Beach

Miyanohama Beach [4 min. by car/ 20 min. on foot from ★] There are a large group of corals on both sides of the beach where many fishes can be spotted. The shoals on the right side of the beach are perfect for observing tide pools during low tides. Be careful beyond the red dotted lines as the current becomes very fast.

(3) Tsurihama Beach

Tsurihama Beach [5 min. by car + 6 min. on foot from ★ / 20 min. on foot from Kiyose, Okumura] A beach with many corals and fishes. The water temperature is relatively low, and it is also a recommended spot for snorkeling experts. Be careful beyond the red dotted lines as the current becomes very fast.

(8) Kominato Beach

Kominato Beach [16 min. by car to Kominato parking space + 8 min. on foot from ★] The entrance path takes you through a small forest of beach trees, which leads to a wide beach with beautiful white sand. As it is a sand beach, there aren't too many fishes compared to some of the other snorkeling spots, but the pillow lava rocks on both side of the beach are an impressive sight worth taking a look.

(7) Kopepe Beach

Kopepe Beach [14 min. by car/ 25 min. on foot from ★] A small beach with white sand and comfortable beach tree shades. Fishes swim around the corals in the water, and you can also swim to Kominato Beach, which is visible towards the left from the beach.

(4) Seiho Beach

Seiho Beach [5 min. by car/ 40 min. on foot from ★] There is a group of staghorn corals towards Futami Rock on the right and the Marine Center on the left. Staghorn corals are very fragile, so please do not stand on or touch them.

(6) Ogiura Beach

Ogiura Beach [12 min. by car from ★] A beach with good access, a shower, and resting space. Areas beneath the water are mostly covered with sand, however there's also some corals towards the far right section near the Kanameiwa Rock, where many fishes gather. In the summer season, it's possible to watch the sun setting on the horizon. There is also a tiny beach on the right that can be accessed from the sidewalk along the road.

(5) Sakaiura Beach

Sakaiura Beach [6 min. by car from ★] Coastal trees grow along this beach and the waters are calm. There are groups of corals on both sides and the sunken ship in the middle of the inlet is home to many fishes. It's a relaxing place to swim, take a stroll, or even enjoy a nap.

	Toilet		Parking space
	Accessible toilet		Shower
