This was the first post station on the Tokaido road, a major thoroughfare that connected Edo and Kamigata (modern day Tokyo and the Kyoto-Osaka region, respectively). Its significance to travelers back then is still visible, indicated by the large number of shrines and temples along the way. Shinagawa-jinja Shrine sits on a small hill and boasts a miniature Mt. Fuji, called Fujizuka. Visitors are welcome to climb this 15-meter high stone structure with steps to take in a view of Shinagawa-shuku. Ebara-jinja Shrine is located alongside the Meguro River and is the only shrine in Tokyo where its mikoshi (portable shrine) is carried into the sea during festivals. This area also features numerous kagigori (shaved ice) shops and cafes, making it a wonderful place for a relaxing stroll.

Safety While Traveling

Preparing for Natural Disasters

Earthquake

When an earthquake occurs, be careful of falling objects and protect your head with an object at hand such as a bag. Don't rush outside in a panic.

When outdoors...

Once the earthquake has stopped, evacuate to an open space along with others, while paying attention to aftershocks, secondary disasters.

When near waterfronts...

Tsunamis may occur, and may happen not only along the coast, but also near rivers. Tsunami waves would be expected to strike land repeatedly. Do not go near waterfronts until the warning is lifted. Watch the actions of people around you and evacuate to higher grounds, or tsunami shelters.

When indoors...

Once the earthquake has stopped, if emergency lights turn on, evacuate by walking along walls, and follow staff instructions. Avoid evacuating by elevators that have not been declared safe.

When safety is confirmed...

Paying attention to aftershocks and secondary disasters, return to your accommodation and get information through websites, TV, radio, etc.

Typhoon / Flood

As the Meteorological Agency provides weather information for disaster prevention, including warnings, get information through websites, TV, radio, etc., and act appropriately.

1. Advisory

The Japan Meteorological Agency will make an announcement when there is a risk of natural disasters due to heavy rain or strong winds.

- ▶ Pay attention to evacuation procedures announced by local governments. In areas where rain/wind impact is expected, consider evacuating early if there are people who need support (handicapped or elderly people, infants, etc.).

2. Warning

An announcement will be made when there is a risk of a serious disaster, and warnings will be issued in relevant areas.

- ▶ Pay attention to evacuation information announced by your local government and swiftly evacuate accordingly.

3. Emergency Warning

Emergency Warnings will be announced when there is a high risk of a major disaster which may occur once every few decades, and which far exceeds the standard warning level.

- ▶ Take appropriate actions in order to ensure safety, such as immediately relocating to a safe area.

Fire

If you are in a shop, evacuate the premises in accordance with the instructions from the staff. If you are in a hotel, make an emergency call to 119 and evacuate through the emergency exit.

Make an emergency call to 119

Heat Stroke

Heat stroke is the general term for various symptoms caused by the body's inability to physically adapt to a hot and humid environment.

Emergency Measures

- ▶ Move to a cool place.
- ▶ Remove excess clothes and cool the body.
- ▶ Replenish water and salt levels.

call to **119**

Measures for COVID-19

For visitors to enjoy traveling in Tokyo while avoiding transmission risks, measures for avoiding infection or infecting others are important.

- ▶ Wear a face mask.
- ▶ Practice social distancing.
- ▶ Always remember to wash your hands.
- ▶ Refrain from conversation in public transport.
- ▶ Enjoy the food and drink more with less talk.
- ▶ Begin the day with a health check.
